DRUGS, MEDICINES. &c.

Dr.WHEELER OCULIST.

INFLAMED, DISEASED AND WEAK EYES.

R. WHEELER, Oculist, No. 33 Greenwich st., New York, respectfully informs the public, that in consequence of his practice having become enlarged to so great an extent, he is compelled to confine his office attendance strictly between the hours of 8 a. m. and 1 p. m. after which he visits his out door patients.

Chronic inflammation of the eyelid, or sore eyes, however long standing, can be effectually and permanently cured, and Films, Specks or insipient Cataracts removed without surgical operation.

**In order that persons in the country may be informed of the eminent success that has invariably attended Dr. Wheeler's practice as an Oculist, and his standing as a professional man in New York, he has selected from a great number of letters the following, recently sent by gentlemen of estimable character, whose families have been relieved by his skillful and successful attention in dangerous and distressing cases.

New York, February 3, 1841.

his skillful and successful attention in dangerous and distressing cases.

New York, February 3, 1841.

Dear Sir—It has occurred to me that if proper publicity be given to the extraordinary cure which you some time since performed upon my infant child; it might be the means of drawing to your attention and care many poor and afflicted children, whose parents are now ignorant of the facility and the rapidity with which you can effect a cure, even in the most distressing and dangerous diseases of the eye. My child, when two months old, was unable to see anything both eyes appearing to be a mass of soreness, and continually oosing from the sockets. Some friend, who knew of your great experience and skill in such matters, induced me to apply to you; and, I am happy to say, the speedy recovery of the child was the consequences. The case itself was of so extraordinary a character, and the cure effected against so many seeming difficulties and disadvantages, that it ought to be made generally known. I am, dear sir, yours respectfully, L. S. WICKER, 84 Broadst.

New York, January 29, 1841.

Dr. Wheeler, Oculist, 33 Greenwich st.

New York, January 29, 1841.

Dear Sir—Prior to your becoming so extensively known as you now are, and before your practice became as extensive as it now appears to be, you were in the habit occasionally of publishing letters from patients whom you had restored, under circumstances of an unusual or remarkable character. Should you deem it worth your while at any time in future (and I think you sometimes ought to do so, for the benefit and informatiou of the afflicted who are unacquainted with you) to publish any similar document, you may refer to my case as one which, of itself, would be the most conclusive evidence of your superior skill as an oculist. Before placing myself under your care I had been a sufferer, from Inflamed and disordered eyes, upwards of ten years, and had consulted many eminent medical men, whose advice and remedies did no good. You, however, by your knowledge of the disease, and aided by the great experience you have lad in treating all disorders connected with the eye, very soon restored me to perfect health, which I continue to enjoy up to this moment. Yours respectfully, HENRY S. ACKELY, 80 Chrystie st.

Dr. Wheeler, 33 Greenwich st.

37 Although Dr. Wheeler would at all times prefer to have a personal consultation with persons requiring his aid, yet there are some cases where individuals can be greatly benefitted by him, by giving him a description of the precise situation and peculiar symptoms of their complaint.—All such may confer with Dr. W. by sending to him comminications, post paid.

Cure for Scalds or Burns .- The following is declared to be an infallible remedy for scalds or burns:

Take soot from a chimney where wood is burned, rub it fine, and mix one part soot to three parts, or nearly so, of hog's lard, fresh butter, or any kind of fresh grease, that is not salted, spread this on linen or muslin, or any cotton cloth for easier or more perfect adaptation. In very extensive burns or scalds, the cloth should be torn into strips before putting over the scald. Let the remedy be freely and fully applied, so as to perfectly cover all the burnt part. No other application is required until the patient is well, except to apply fresh applications of the soot and lard, &c.

In steamboat explosions, this remedy can in nearly all cases be at once applied, and if done, many valuable lives will be saved, and a vast amount of suffering alleviated.

THE AFFLICTED & THE POOR—Many unfortunate individuals whose means have left them but little, have thrown that little upon those who have had no legal claim to receive it, the consequence was they have received no benefit but injury, in but too many cases becoming a missery to themselves and others. Dr. MORLAND, a graduated physician of the London College, and late Assistant Physician of the Naval Hospital, Bermuda, for many years, there having had those opportunities which so few possess has the pleasure of now being a benefit to his suffering fellow creatures. His sudies have been confined to the following diseases, for which he receives no pay if he does not cure—Ulcers, or King's Evil, Scrofula, Consumptien, Cancer, Dyspepsia, ('phalmia, and all those diseases originating in a terpid action of the Liver, or cutaneous exhalents.

N.B—Certificates of cures will be given on applying at the Dispensary Office, No. 472 Greenwich st.

The poor still continue to receive advice and medicine gratis, from 9 to 10 every morning, except Sundays.

Letters addressed, post paid, will be attended to.

DR. MORLAND.
